

## BIOS Drycal DC-2 Air Flow Calibrator

### SPECIFICATIONS:

- Power: rechargeable lead acid battery.
- Range:  $\pm 1\%$  flow ranges. 10 mL/min to 300 mL/min (optional). 100mL/min to 5L/min, 500mL/min to 30 L/min.

### RENTAL AND APPLICATION NOTES:

- Shipping Weight: 3 lbs.
- The BIOS DC-2 air flow calibrator is a field portable primary air flow standard. It uses “near frictionless” piston technology - traversing a known volume to measure flow rate.
- This unit corrects to atmospheric pressure and user-definable temperature corrections based on built-in sensors.
