

Technical Heater™ Heated Sample Lines (HSL)

SPECIFICATIONS:

- Length for PTFE: 2ft, 5ft, 10ft, 25ft, 50ft, and 100ft
- Length for Stainless Steel: 10ft, 15ft, 25ft, and 50ft
- Power: 110 VAC/60Hz, 20Amp
- Operating temperatures: max 400°F

RENTAL AND APPLICATION NOTES:

- Heated Sample Lines (HSL) include a CleanAir Express Heated Control Box, designed to allow the user to select line temperature up to 400°F
- Heavy duty lines are available for cold climates
- All lines are checked for CO background, THC background, and SO₂ scrubbing before each rental
- HSL can be combined together to reach longer distance
